To the member institutions of the Montana Post Secondary Educational Opportunities Council:

MPSEOC is a unique, innovative, effective organization, and I would be thrilled to represent Montana Tech on its board. While last year was my first year actively participating in the organization's many services for students and member institutions, I believe I could serve the board with my experience in different facets of higher education including marketing, recruitment, fundraising, and events.

Everything on my resume I owe to my college experience--higher education transformed my life. Over the past three years of my work at colleges and universities in Montana, I've learned that each institution in our state is a place for students in all walks of life to have these transformational experiences.

I look forward to working with all of you in the next year, and I appreciate your consideration!
